

SLUDGE GULPER UNIT

The Sludge Gulper Unit is a small robust air driven unit which will move heavy sludge from one location to another.

- Capable of handling liquids with solids content of up to 15%
- Minimum moving parts ensure ease of on-site maintenance
- Automatic continuous suction / discharge cycle
- The unit is small and portable and can be used in confined spaces

The suction capability of this unit allows the recovery or transfer of heavy fluids with significant solids content. It has proven itself in numerous North Sea and overseas locations when used on its own or as part of our Equipment Packages.

The simple design of this unit allows for straightforward maintenance.

- Operates on a single venturi
- Uses a single ejector which requires no priming
- 80% maximum vacuum
- Will vertically lift 25ft of fresh water
- Will vertically lift 20ft of 10 ppg fluid

SPECIFICATION

Weight and Dimensions:

(L) 71cm x (W) 32cm x (H) 60cm

Unit Weight: 58kg

Air Consumption:

Requires a supply of air between 90 to 110 psi
(6.2 to 7.5 bar)

RENTAL & PURCHASE

The Sludge Gulper Unit is available for rental (short term or long term) or purchase and is supplied complete with:

- 25ft of 2" Suction Hose and Fittings
- 25ft of 2" Discharge Hose and Fittings
- 50ft of 1" Anti Static Air Supply Hose and Fittings
- Copy of Operating Manual
