

TRASH COMPACTOR

The Trash Compactor provides an economical and reliable solution for large producers of general waste. The design ensures simple and safe operation and the compaction capability of the unit reduces the cost of waste disposal and valuable storage space. The unit also has a sanitizer spray to eradicate any unpleasant odours.

- Air over hydraulic operation
- Easy loading and unloading
- Disposable bag with 1250kg Capacity
- Drum Crushing Facility

By simply hooking up a one inch air hose the compactor is primed and ready.

The ram load of 30 to 35 psi produces 40,000 lbs of compacting force thereby reducing the waste into a 30 Cu.Ft. bundle. The waste is compacted into Polypropylene interwoven bags (FIBC) which are rated to a working load to 1250kg thus offering a 6:1 safety factor.

The bags are tough, replaceable and economically priced, and because they are disposable, storage space and spare containers are eliminated.

SPECIFICATION

Weight and Dimensions:

L) 269cm x (W) 163cm x (H) 267cm

Unit Weight: 1939kg

Air Consumption:

Requires a supply of air between 90 to 110 psi (6.2 to 7.5 bar) which is internally regulated to 90 psi (6.2 bar)

RENTAL & PURCHASE

The Compactor is available for rental (short term or long term) or purchase and is supplied complete with:

- Safety Cage
- Certified Lifting Assembly
- Copy of Operating Manual

The Compactor can also be supplied with optional extras - Drum crushing anvil and Drip tray. The drum crushing anvil can crush up to 55 gallon drums. Crushed drums will be reduced to between 5.5" and 6.5" in height.
